Fresh Tobacco Never Bites; Dry, Cut-up Tobacco Does

Only when the natural moisture dries out of tobacco can a "bite" get into it. In the Sickle plug, all the moisture, flavor and fragrance are pressed in and kept in by the natural leaf wrapper. Every pipeful you whittle off the plug is fresh-so you always get a slow-burning, cool, sweet, satisfying smoke.

If you want your tobacco already cut up for you, in packages, you have to be content with dry tobacco, that burns fast and hot, and bites your tongue.

That's why experienced smokers cut up their own tobacco, from the Sickle plug. They get more tobacco, because they don't pay for a package—and better tobacco,
